# Capstone Project

Timothy Myers  CSSC

# Key and Inventory Assistant

# KIA

- System to help save the CSC Department secretary time and effort.

- Will help manage
  - Physical keys
  - Card key groups
  - Other inventory as needed

# Lessons

- Qt is Awesome
  - It provided much functionality
  - A bit Java like
- Error Checking and Handling
  - A lot of it
  - Even for an unambitious project like mine

# Non-accomplishments

- E-Mail
  - Valerie wished a generic e-mail sent to late or almost late borrowers
  - Not in Qt
  - TIKI

# Achievements

- Tim Tested, Valerie Approved
  - (So far)
- Error Checking and Handling
  - I believe it to be stable and reliable
- KIA is completed
  - Ruthe likes this as well

# Demo and Portfolio
